

The BALCANIC metal tile is profiled in steel with thickness between 0.45 and 0.60 mm, galvanized (Z225-Z275), covered with a layer of glossy and mat paint version.

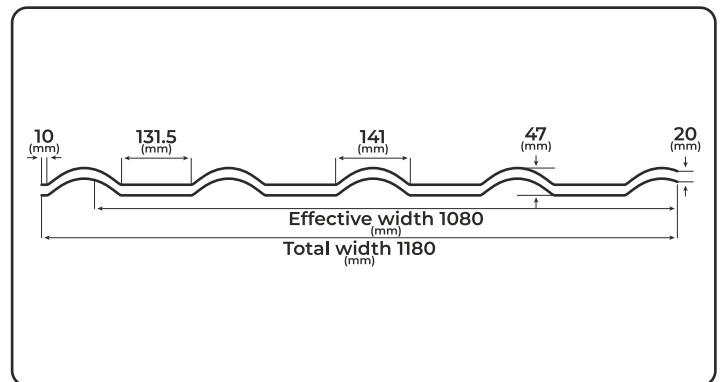

It is an elegant and durable product, combining traditional with modern appearance, manufactured using advanced technology equipment.

This type of cover is mainly used in building refurbishment, providing an elegant conservation aspect.

The BALCANIC metallic roof tiles are manufactured in a wide range of colors.

BALCANIC metal tile can be delivered with lengths between 500 mm and 7000 mm.

An old building or a heritage building, once covered with this type of tile is protected from weather conditions, while its architectural beauty is highlighted.

TECHNICAL CHARACTERISTICS	Material	Steel sheet, galvanized on both sides, protected with polyester
	Nominal thickness	0,45 mm - 0,6 mm
	Total width	1180 mm
	Effective coverage width	1080 mm
	Module length	350 / 400 mm
	Total height	47 mm
	Weight on the surface	4 - 5 kg / sqm
	Minimum slope	8° if diagonal joints are necessary/ 14 ° in the case of diagonal joints
	Glossy finish warranty	10-year warranty for color characteristics and corrosion
	Matte finish warranty	15-year warranty for color characteristics and corrosion
GrandeMat finish warranty	30-year warranty for color characteristics and corrosion	
Expected lifespan	60 years, resistance to temperature changes
