

DACIC

Bilka Dacic metal roof tiles successfully combine the traditional style of old roof shingles with the innovation of a modern roofing product.

The tile model is profiled from 0.45 to 0.60 mm thick zinc-plated steel (Z225-Z275), coated with paint, with various finishes (gloss, matt, GrandeMat) and can be delivered in lengths ranging from 500 mm to 7000 mm and can also be produced in modular form.

Dacic metal roof tiles are a convenient choice for any roof, designed to maintain its specifications and properties for a long period of time.

Thanks to its technical specifications and design, Bilka Dacic is a roofing solution suitable both for old houses that aim to preserve traditional lines and for new buildings.

TECHNICAL CHARACTERISTICS	Material	Steel sheet, galvanized on both sides, protected with polyester
	Nominal thickness	0,45 mm - 0,6 mm
	Total width	1180 mm
	Effective coverage width	1055 mm
	Module length	350 / 375 / 400 mm
	Total height	39 mm
	Weight per area	4 - 5 kg / sqm
	Minimum slope	8° if no diagonal joints are necessary/14 ° in the case of diagonal joints
	Glossy finish warranty	10-year warranty for color characteristics and corrosion
	Matte/Wood finish warranty	15-year warranty for color characteristics and corrosion
GrandeMat finish warranty	30-year warranty for color characteristics and corrosion	
Expected lifespan	60 years for the roof, resistance to temperature changes
